

Warm-up

Grab a graphic organizer from the turn-in tray table on your way in.

Explain how a microscope enables us to see things that are too small to be seen by the naked eye.

Protists

7th Grade Science

Essential Standard 7. I.1.1

Compare the structures and life functions of single-celled organisms that carry out all of the basic functions of life including:

- Euglena
- Amoeba
- Paramecium
- Volvox

I will explain how unicellular organisms move, feed, reproduce, and release waste.

Discovery Ed

Go to my website and click on these notes.

Go through the Discovery Ed board on Protists

Watch all the videos and read all the articles

Fill out the graphic organizer and answer the questions on the back.
