

Warm-up

Have your homework out to be checked.

Watch both videos in preparation for today's lab.

[How to use a microscope](#)

[Wet mount slide](#)

When done with the videos, you may use any remaining time to study for the microscope quiz.

Quiz

When you finish your quiz, place it in a neat stack on my front desk.

While I grade the quizzes:

- please quietly finish watching the videos if you did not
- Then scroll ahead in these slides to the activity and copy down the chart in your notebook.

Day 4 Protists Lab

7.L.1.1

Essential Standard

Compare the structures and life functions of single-celled organisms that carry out all of the basic function of life including: Euglena, Amoeba, Paramecium and Volvox.

Activity

Materials: Notebook and colored pencils.

1. Copy this [chart](#) in your notebook.
2. Look at each of the four prepared slides.
3. **Draw** what you see on each slide in your chart.
4. Prepare a wet mount slide of some pond water. Draw what organisms you see in the chart. Note how they move.

Homework

Answer the 6 questions using the text.
